Art Unit: 1774

1. The abstract of the disclosure is objected to because it includes the legal word, "comprises". Correction is required. See MPEP § 608.01(b).

2. Claims 2,4,5, 6 , 7, 14 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 includes improper Markush group. See claims 4,5 and 6 also for similar problem.

In claim 10, line 2, the phrase, "a harder material" is vague and indefinite.

Applicants are requested to provide better claim language for examination.

3. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

4. Claims 1,3,10-15 provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1,4,5,6-8, and 11 are of copending Application No. 10/744008. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1774

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by

Demendi et al(US 5538649)

The cited reference teaches the claimed article comprising compound s as claimed of specific weight percent and binder material( col 2, lines 52-59; col 3, lines 10-36; see entire reference. concerning claims 2-10, the reference teaches heat treating its material, and employing same for sealing purposes- see above. The reference teaches silicon carbide mating element in example 4, col 9-10).

7. Claims 12-15 are rejected under 35 U.S.C. 102(b) as being anticipated by

Watada et al(US 5990222). The cited reference teaches the claimed process including blending source material,, mixing and molding the material- col 3, lines 9-12; col 4, lines 18-24; col 4, lines 30-45; see Examples cited. Concerning claims 13-15, the reference teaches similar resin material, fiber dimensions- see reference. In the alternative, the specifics of the article limitations are not germane to the instant question for patentability which must be manipulatively distinct- Ex parte Pfeiffer, 21962 C.D. 408(1961). The process is carried out in similar temperature ranges as claimed.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kagawa is cited of interest to show the state of the art.

9.
